

IN THE SPECIFICATION

Page 9, delete the paragraph starting on line 14 and replace it with the following:

b. a DNA sequence encoding the signal sequence of a plant protein able to ~~target dispatch~~ said lysosomal enzyme to seed storage organs and to provide the post-translational modifications required for the expression of the enzyme in active form;

Page 17, delete the paragraph starting on line 8 and replace it with the following:

A promoter suitable for practicing ~~[[of]]~~ the present invention is the promoter of the basic 7S soy globulin (SEQ ID NO 6). The expression cassette according to the present invention further comprises a DNA sequence coding for the signal sequence of a plant protein able to ~~target dispatch~~ said lysosomal enzyme to the seed storage organs and to ensure the post-translational modifications required for the expression of the enzyme in enzymatically active form.
